

UJJWAL TYAGI

Computer Science Undergraduate

Hapur, India — +91 7417614269 — tyagiujjwal239@gmail.com

LinkedIn — GitHub — LeetCode

PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech 2028, GPA: 8.4/10) with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, and Computer Networks. Proficient in C++, Java, Python, and JavaScript with experience developing software applications and real-time systems. Microsoft Hackathon Top 5 Finalist with demonstrated problem-solving and collaborative engineering skills.

TECHNICAL SKILLS

- **Languages:** C++, Java, Python, JavaScript, C#.
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks.
- **Technologies:** HTML5, CSS3, WebSockets, REST APIs
- **Tools & Platforms:** Git, GitHub, Unity Engine, Blender, MARS Simulator.

PROFESSIONAL EXPERIENCE

Java Developer Intern — Elevated Labs — [1 Month]

- Developed Java-based applications and completed software development assignments focused on object-oriented programming principles.
- Implemented CRUD (Create, Read, Update, Delete) systems and management applications using Java.
- Applied data structures and algorithms to solve programming challenges and improve code efficiency.
- Collaborated with mentors through code reviews and feedback sessions to improve software quality.
- Technologies Used: Java, OOP, Git

PROJECTS

CabConnect — Cab Fare Comparison Web App — March 2026

- Engineered a web application that compares real-time fares across Uber, Ola, and Rapido, reducing user search time by approximately 30%.
- Integrated Uber's official API for live pricing and implemented a simulated data layer for platforms without public APIs.
- Developed a responsive interface that displays the cheapest and fastest ride options across multiple service providers.
- Technologies Used: JavaScript, HTML, CSS, REST APIs.

<https://cab-connect-hazel.vercel.app/>

MatchingHub — Real-Time Chat Web Application — Dec 2025 – Feb 2026

- Developed a real-time random chat platform featuring user matching and secure friend requests.
- Implemented WebSocket-based messaging, achieving sub-second latency for instantaneous communication.
- Integrated privacy controls and moderation features to improve user safety and environment quality. <https://final-matchinghub.onrender.com/>

- Technologies Used: WebSockets, HTML, CSS, JavaScript.

EDUCATION

Bachelor of Technology in Computer Science — Bennett University — Expected July 2028

- Current Status: 3rd Year Student — GPA: 8.4/10
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems, Design and Analysis of Algorithms

PROBLEM SOLVING

- Solved 100+ Data Structures and Algorithms problems on LeetCode.
- Strong understanding of Arrays, Linked Lists, Trees, Graphs, Hashing, Binary Search, and Dynamic Programming.

ACHIEVEMENTS

- Microsoft Hackathon: Achieved 4th Place globally for an IoT & AI-based Smart Farming solution.
